CONDITION CODE

Description. The Condition Code is used to classify materiel by denoting the degree of serviceability, condition and completeness in terms of readiness for issue.

Number of Characters: 1

Type of Code: ALPHA/NUMERIC

CODE	DEFINITION
------	------------

- | | |
|---|--|
| A | Serviceable (issuable without qualification). New, used repaired, or reconditioned material which is serviceable and issuable to all customers without limitation or restriction. Includes material with more than six months shelf life remaining (See Note 1). Includes items that are always inspected, assembled, calibrated, tested and/or adjusted prior to issue, overage stock which, if by extending the expiration date, is serviceable with no restriction on issue. Note: For Clothing and Textiles, identifies only new and unused stocks. |
| B | Serviceable (issuable with qualification). New, used, repaired, or reconditioned material which is serviceable and issuable for its intended purpose but which is restricted from issue to specific activities or geographical areas by reason of its limited usefulness or short service life expectancy. Includes material with three to six months shelf life remaining (See Note 1). Includes items subject to deterioration or spoilage which are unsuitable for extended future storage or for general, unrestricted issue e.g., recapped tires, repaired or reconditioned clothing, rubber products, overage subsistence. |

CONDITION CODE

CODE	DEFINITION
C.	Serviceable (priority issue). Items which are serviceable and issuable to selected customers, but which must be issued before Condition Code A and B material to avoid loss as a useable asset. Includes materiel with less than three months shelf life remaining. (See Note 1).
D.	Serviceable (test/modification). Materiel which requires test, alteration, modification, technical data marking, conversion, or disassembly. This does not include items which must be inspected or tested immediately prior to issue.
E.	Unserviceable (limited restoration). Materiel which involves only limited expense or effort to restore to serviceable condition and which is accomplished in the Storage Activity where the stock is located. Includes materiel which may be serviceable for its intended use in all respects but is restricted from issue due to preservation, packing, or marking deficiencies; and materiel requiring minor modification, repair or adjustment not constituting repair, rebuild, or overhaul at a maintenance facility.
F.	Unserviceable (reparable). Economically reparable materiel which requires repair, overhaul, or reconditioning (includes reparable items which are radioactively contaminated). Includes overage stock only if by maintenance action the items can be restored to a serviceable condition and outdated blood if blood is to be reprocessed.
G.	Unserviceable (incomplete). Materiel requiring additional parts or components to complete the End Item prior to issue. Includes incomplete sets, chests, kits and unfinished materiel requiring milling or finishing. Materiel normally stocked in a unassembled state is not classified under this condition, nor is this condition used for groupings of components normally stocked as individual items.

CONDITION CODE

CODE	DEFINITION
H.	Unserviceable (condemned). Materiel which has been determined to be unserviceable and does not meet repair criteria (includes condemned items which are radioactively contained). Includes items which exceed the repair limitation or which, by virtue of their composition are not capable of being restored to an issuable condition by repair, reprocessing or other means.
I.	Not assigned.
J.	Suspended (in stock). Materiel in stock which has been suspended from issue pending condition classification or analysis, where the true condition is not known. Included stocks awaiting laboratory testing, materiel suspended from issue because of deterioration or damage not the result of a deficiency in a procurement action, and receipts resulting from redistribution order only.
K.	Suspended (returns). Materiel returned from customers or users and awaiting condition classification.
N.	Suspended (ammunition suitable for emergency combat only). Ammunition stocks suspended for issue except for emergency combat use.
O.	Not assigned – (not to be assigned).

CONDITION CODE

CODE	DEFINITION
L.	Suspended (litigation). Stocks held pending litigation or negotiation with contractors or common carriers. Includes contractor supplied materiel undergoing laboratory tests or legal action any accepted materiel found to have concealed shortages or damages or latent defects, contractor risk shipments, and overages in excess of quantity provided in contract.
M.	Suspended (in work). Materiel identified on Inventory Control Record but which has been turned over to a maintenance facility or contractor for processing.
P.	Suspended (reclamation). Materiel determined to be unserviceable, economically repairable as a result of physical inspection, tear down or engineering decision. Item contains serviceable components or assemblies to be reclaimed – not applicable to Intra-DLA transactions. Distribution Depots will, within their assigned mission, recognize and process transactions received from service IMS.
Q.	Suspended (quality deficient exhibits – (See Note 2). Quality deficient exhibits returned by customers/users as directed by the IMM due to technical deficiencies reported by quality deficiency report. Exhibit required technical or engineering analysis to determine cause of failure to perform in accordance with specifications. This code is for Intra-Air Force use only.

CONDITION CODE

CODE	DEFINITION
S.	Unserviceable (scrap) – items that have no value except for basic materiel content. No stock will be recorded as on hand in Condition Code ‘S’. The code is used only on transactions that involve shipment to DPDP’s. Materiel will not be transferred to Supply Condition Code ‘S’ prior to turn-in to DPDO’s if materiel is recorded in supply Condition Code ‘A’ through ‘H’ at the time materiel is determined excess. Materiel identified by NSN will not be identified by this Supply Condition Code.

T - Z Not assigned – reserved for DOD assignment.

Note 1: Refer to DOD Instruction 4140.27, for serviceability time frames associated with Shelf Life Items.

Note 2: DLA does not accept assets for these codes.
